

Problem

Check [Tutorial](#) tab to know how to solve.

The included code stub will read an integer, `n`, from STDIN.

Without using any string methods, try to print the following:

Note that " " represents the consecutive values in between.

Submissions

**Example**

Print the string `1 2 3`.

**Input Format**

The first line contains an integer `n`.

**Constraints**

Leaderboard

**Output Format**

Print the list of integers from `1` through `n` as a string, without spaces.

**Sample Input 0**
